PERSONAL STATEMENT

Working with web development and web design since October 2021, I have developed several Webpages projects that helped solving real problems. Using my knowledges in HTML5, SASS, JavaScript, SEO, Clean Code, Git and Github, I am developing not just beautiful websites, but highly acessible, functional and easy to use ones, thinking always in user experience and website maintance.

WORK EXPERIENCE

Front-End Developer and Web Designer

At Carvalho Artes

April 2021 – September 2022

Carvalho Artes is an agency that provides marketing, visual and social identity services. They have the mission to transform how people see a brand and how they interact with them using design and creativity.

- I was responsible for the development of the official web identity of the agency. building the oficial Carvalho Artes web design and website, using the most advanced web technologies such as HTML5, CSS3, and JavaScript to create a better performance along with Git and Clean Code concepts to porpose a better code structure, and a better maintance of the source code.
- Hosting and maintaining Carvalho Artes official website, using concepts of internet, internet protocols along with SEO and web hosting services.
- Web Design along with user experience was very important aspects before I start to code the webpage. I had the opportunity to implement my design skills to build a better user interface thinking about the final user.

Front-End Developer and Web Designer

Freelancer

October 2022 – Present

I am currently working as a freelancer web developer and web designer. Working in dynamic, responsive and accessible webpage projects along with web design and user experience, building legible codes, accessible and documented, using clean code concepts, semantic and code reuse.

- Developing responsive and accessible webpages with HTML5, SASS, JavaScript, Git, and SEO to propose a better maintenance, and ranking on the internet.
- Translating designs and wireframes into high-quality code.
- Learning ReactJs and Nodejs by developing personal projects with reusable components for future use.
- Participating in collective's web design and web development projects, using git and github for better code interconnection and group working.

Web and Software Development, Design and Digital Marketing

Type Somethings (my own organization)

November-December 2022 – Present

On November to December of 2022, I have created my own organization. Focused on web development, web design, digital marketing and visual identity development, Type Somethings is my biggest personal project that I am planning to turn it into something much bigger. Type Somethings is also a way that I have found to participate more in the open-source community, developing open-source and free projects for everyone's access, primarily on github.

- Developing open-source projects for the open-source community on GitHub.
- Building simple Java software's for studies.
- Developing high-quality web projects and web apps using ReactJs.
- Building new visual identities, using creativity and passion on design to create unique ideas and implement them into a new project.
